

Summary of Our Services

Tax Planning

The goal of tax planning is to minimize tax burdens by implementing a proper strategy. Several firms claim to provide clients with tax planning only to overlap this service with tax preparation. Although our services work hand in hand, both are separate. The Eldridge Group specializes in providing its clients with individualized solutions for their business.

Business Consultation

The Eldridge Group provides clients with a consultation service that allows owners and CPA's to collaborate together with the goal of producing a more efficient business structure. This collaborative environment allows the most comprehensive plan to be generated to ensure that the owner and the business achieve the lowest effective tax rate, while complying with all of the nations' tax codes.

Accounting

Our accounting service uses efficient bookkeeping methods that allow business owners to spend time focusing on activities that generate revenue. The Eldridge Group provides clients with monthly, quarterly, and yearly financial statements that are derived from accurate financial entries. This service is supported by one of the leading professional accounting software

Payroll

Payroll is a vital business operation. There are numerous regulations that must be complied with on both the state and federal level. Along with meeting regulations, employers also must ensure they pay employees accurately and in a timely manner.

Tax Preparation

The Eldridge Group understands the importance of filing taxes properly to ensure that largest refund, while complying with the tax codes. The tax preparation service provided to the clients is the highest quality in the industry. Unlike tax programs you can use online or purchase for your computer, The Eldridge Group is able to adapt to every individual's situation. This flexibility ensures you will receive the largest refund possible.

IRS Representation

Along with the five other individualized services The Eldridge Group provides to the public, IRS Representation is also available. Our tax professionals will work with you and/or your business if you are audited by the IRS.
